

6. Interior View Multi-Purpose Room Looking E: On the left is the main entrance from the Gallery. Further back is the side entrance, directly outside of which is the Lift door, then a short set of stairs down to the Gallery, and (not visible) the doorway connecting to the existing building, on the stage level. The left-most sliding door opens to the audio-visual closet, and the right-most sliding door opens to the storage area for Multi-Purpose Room furniture. (Further to the right appears the windowed section of the building where the new stairway descends to the lower level.)
